### Please Read Before Ordering

**TERMS NET CASH** within 30 days after date of invoice, to those of known responsibility, unless otherwise agreed upon. Customers unknown to us will please send all cash with order or satisfactory references, allowing time for investigation. Or, one-fourth cash may be sent with order, balance to be collected through customer's bank by sight draft attached to bill of lading. No stock will be sent C. O. D. unless one-fourth or more cash is received before shipment.

**PACKING** for shipment will be charged additional, just sufficient to cover cost of materials. Packing charges are nominal, usually from \$4.00 to \$10.00 per thousand trees, depending on variety and size; grape and other vines and fruit plants much less. Our packing methods are perfect, and shipment can be made with safety to any point within the United States or even beyond.

**SUBSTITUTION:** Please state whether or not you wish substitution in case some sort ordered is sold out, as sometimes happens, especially in orders calling for a long list of sorts; usually another equally as good (and frequently better), of about the same character and season of ripening, can be supplied, thus preventing a shortage. Therefore, **unless otherwise instructed**, we will substitute in such cases where the number is small, sending only sorts known to be good, and as nearly duplicates of the sorts called for as possible.

**TRUE TO LABEL:** With the personal attention we give to the securing of buds and scions errors in label are well nigh impossible, but so long as propagation depends upon humanity a mistake may at some time occur, in which case we will, upon reasonable proof of error, replace all wrongly labeled trees free of charge, or refund the price paid for them, but it must be understood and agreed that we are to be held liable for no greater amount, and orders must be accepted by the buyer on this basis or the stock must be promptly returned.

Five trees, vines or plants of one variety (one name) will be furnished at the 10 rate, 50 at the 100 rate, 300 at the 1000 rate. Where no 100 or 1000 rate appears, the rates named will apply regardless of any larger quantity that may be ordered.

## GRADES AND SIZES

All of our Deciduous Fruit Trees are graded into three sizes by caliper (diameter, or thickness of body), measurements being taken a few inches above the bud. **Caliper is the only true test of a tree's quality.** No faulty or worthless trees go into any size, all such being consigned to the brush pile.

In this list we give both caliper and height, but please note that the calipers govern, the heights given being approximated.

In nearly all cases the trees will measure up to the heights specified; for instance those graded  $\frac{1}{2}$  to  $\frac{3}{4}$  inch in caliper will usually measure from 4 to 6 feet or even taller, but some varieties such as almonds, figs and Muir peach sometimes do not grow so tall, but are amply large in body to be really first class, 4 to 6 feet stock. These stocky, but rather short trees, when planted out and properly pruned back, make a much better showing and more uniform growth than trees graded solely by height.

Many planters can recall having received from certain nurseries, tall, spindling, weakly trees for first class 4 to 6; and while such trees really measured 4 to 6 feet, yet they were entirely too slender for first class and should have been sold as one of the smaller sizes at a reduced price. Our system of caliper grading insures planters against all such disappointments.

Cal. Advance	Governor Wood	PORTER TARTARIAN	
Centennial	Lambert	Royal Ann	

\*Sour or "Pie" Cherries

**PORTER TARTARIAN**—A strain originated and grown for a number of years by Mr. Robert Porter of Santa Clara. As compared with the common strain of Tartarian the "Porter" is a trifle later in ripening; the fruit is firmer, a better shipper, does not crack with rain and does not sunburn under conditions of extreme heat. The tree is a strong, healthy grower and exceedingly prolific, fully as reliable and heavy bearing as Royal Ann. Decidedly the best Tartarian except for sections where extreme earliness is a factor.

## PEACH—Clingstones and Freestones

On Peach Root

1-year, $\frac{1}{2}$ inch and up, 4 to 6 ft.....	\$ .90	\$8.00	\$75.00
1-year, $\frac{3}{8}$ to $\frac{1}{2}$ inch, 3 to 4 ft.....	.80	7.00	65.00
Alexander	Heath Cling	Opulent	
ALTON	Henrietta (Levy) Cling	PATISON	
Crawford Early	Indian Blood Cling	Peak's Cling	
Decker	J. H. Hale	Phillips Cling	
Elberta	Lovell	Tuscan Cling	
Fay Elberta	Mayflower	Salway	
Foster	McKevitt Cling	Selma Cling	
Hales Early	Muir	Strawberry	

**ALTON**—The aristocrat of all the peaches; in quality and appearance, all that is desirable. Very large, almost globular, highly colored on sunny side. Flesh clear white with some red at pit; tender, juicy, free from fiber, deliciously flavored; a perfect freestone. Those who like freestone peaches for canning and those who want the **best peach** known for eating fresh **must** have Alton.

**PATISON**—Fruit extra large for its season, which is immediately following Alexander, thus filling with a really fine peach the gap so long open between Alexander and Hales. Flesh clear, golden yellow, partially clinging to the seed as do most early peaches; firmer than Alexander, fine grained, highly flavored, best in quality of all early sorts.

## FEIJOA SELLOWIANA

(Pineapple Guava)

Each

Balled plants, from open ground, 4 to 5 ft.....	\$3.00		
Strong plants, from 5-inch pot, 2 to 3 ft.....	1.00		

Not a true guava, but closely allied to that fruit, and in the search for a common name it has been called Pineapple Guava. Much hardier than the guavas, as it stands a temperature of 10 or 12 degrees above zero without injury. A pretty evergreen shrub and when in flower there is nothing handsomer. The thick, waxy petals, pure white on under side, shaded to purple-crimson on the upper, and surmounted with a great tuft of crimson stamens, make it a flower of extreme beauty.
